SECTION II: OBJECT OF THE CONTRACT

II.1) DESCRIPTION

II.1.1) Title attributed to the contract by the contracting authority *(as stated in the original notice)*
High Heat Flux Test Facility for In-vessel Components

II.1.2) Short description *(as stated in the original notice)*

This procedure concerns the provision (possibly design, procurement and commissioning or alternatively the upgrade of an existing facility) of a High Heat Flux (HHF) test facility for ITER In-Vessel Components (IVC), principally the Blanket First Wall (FW) panels. Additional IV components may also be tested including the Divertor Inner Vertical Targets and ICRF Antenna screens. The services concern Initially, this facility will be dedicated to the series acceptance tests of the IVC which are part of the EU contribution to the ITER project.

In the first phase of the contract (Task 1), the Supplier shall, based on a conceptual design elaborated during the bidding phase (competitive dialogue), prepare a technical specification for f the test facility. In the second phase of the contract (Task 2), the Supplier shall procure the necessary parts and qualify the test facility. Typical parameters of the HHF tests of the IVC's (which will be carried out in the third phase of the contract) are given in the appendixes as the basis for the conceptual design and cost of the facility as well as the subsequent cost evaluation for the IVC's HHF tests.

Deliveries are foreseen within 3 months from placement of the Contract for the detailed technical specification, within 16 months, for procurement/delivery of the facility and within 18 months for the commissioning The period of testing is expected to last 10 years from commissioning.
